- Each channel top panel female XLR in and side panel male XLR out.
- Box use male PQ multi-pin connector with protective cover.
- Fantail use female PQ multi-pin connector.

Patented axis design inside of the case.

High-quality solder process.

Side of the door openings convenient for cable end exposed outside the case.

- ① Bifurcation structure, beautiful and properly to protect wire.
- ② Fantail can be split, placed into the flight case of mixer, it's good for pre-wiring in the warehouse, to reduce entering and exiting time at stage.

- ③ Colorful fantail, easy to find and wiring, channel cable with PVC tube and number tube.

8 channels are a cycle,  
e.g. CH1-8, CH9-16, CH17-24, etc.

- ④ Fantail storage bag: Reducing fan-end mixed with other equipment inside of case and caused damage.
